Email of person filling out this Initial Proposal *	barb.stevenson@washburn.edu
Title *	Lecturer
Problem / Opportunity Statement *	Lack of space and technology to do on-line testing.
Select one quality initiative sub-theme. *	Technology Competence
Sub-theme description. *	Our current class sizes vary from 70-90 students in a semester. I would like to do on-line testing over content covered in class. I would like to test all students at the same time. There is no place on-campus that would allow this to occur. If we ask students bring in their own laptops not all students have them and their having to sit in close proximity to each other increase chace for cheating. Currently if we do on-line testing at one time we have to use 3 different locations and must provide 2 extra faculty to proctor the exam.
Benefits *	All students can be tested at the same time with one proctor. May decrease chance or decrease opportunity to cheat.
Scope *	If the SON continues to admit 80 students a semester the large class sizes will continue. There is a desire to do on-line testing but space and testing security are still not present to allow us to do this.
