

THE BACHELOR OF SOCIAL WORK PROGRAM

The BSW Program is designed to prepare social work students for professional generalist practice. This involves the application of a diverse knowledge base, professional values, and a wide range of skills. Social workers utilize their knowledge and skills to assist individuals, families, groups, communities and organizations to improve social functioning and obtain the resources needed to accomplish identified goals. Social workers strive to create social change and eliminate social and economic injustice. Careers in social work occur in a variety of settings, such as public/state social services, hospitals, schools, mental health agencies, courts, nursing homes, crisis centers, and children and family service agencies. Career options include direct practice with clients, administration, social planning, and legislative advocacy. Effective social work is centered in assessments of the person-in-the-environment, and the subsequent skillful selection of multilevel interventions, in keeping with social work values and ethical practice.

In addition to core social work courses, BSW students at Washburn University have the opportunity to take four social work electives and complete two semesters of practicum (internship) in social service environments under the supervision of a licensed social worker. Graduates of our program are well-prepared to enter the field and make a difference in the lives of others.
